The screenshot shows a mobile application interface with a dark red header. A modal dialog titled "USSD Common Configuration" is open, featuring a progress bar at the top with three steps: "Details" (checked), "Services" (checked), and "Settings" (active, indicated by a red exclamation mark). The dialog has a close button (X) in the top right corner. On the left side of the dialog, there is a sidebar menu with four categories: "1 SMS", "2 USSD", "3 CAAS", and "4 Subscription". The "USSD" category is selected and highlighted with a red box. Under "USSD", there are two sub-options: "Common" (selected with a purple dot) and "Robi" (unselected with a grey dot). The main content area of the dialog contains a "Connection URL" field with a red asterisk, which is highlighted with a red box and contains the text "https://xyz.com/pro/usd.php". A blue arrow points from the URL in the top box to this field. Below the URL field is a "Subscription Required" toggle switch, currently set to "NO". At the bottom of the dialog, there are three buttons: "Save as Draft", "Back", and "Next". The "Next" button is highlighted with a red box.
